

## FOUR GOOD REASONS FOR YOUR PARTICIPATION

### Expert forum

Don't miss the newest trends and solutions! Experts of the leading accumulator and charger manufacturers inform you about the newest innovations.

### Training seminars

Expand your knowledge with the most important basics and developments in the field of accumulator technologies.

### Exhibition

Make new contacts on the booth and get advice from experts about new products and technologies.

### Fun parcours

Experience the e-mobility! Drive a few rounds with an electric car, an e-bike or a pedelec. Just have fun with tomorrow's vehicles!

## BENEFIT FROM THE "INSIDER KNOW-HOW" OF THE EXPERTS

Exhibitors 2013

MARCH 25-27, 2014  
IN THE STADTHALLE  
ASCHAFFENBURG

[www.batteryuniversity.eu](http://www.batteryuniversity.eu)

In Germany lithium ion batteries are being utilized more than one hundred million times a day, no matter if in cell phones and laptops or in electric toothbrushes, cordless screwdrivers and lawnmowers, pedelecs and countless more applications. The term "Li-ion" has long been a strong argument for buying. However, for competitive reasons it is immensely important for the battery industry to develop even more powerful, even smaller and even safer batteries. In order to offer the industry as well as the end user the possibility to inform about latest technological trends from experts at first hand we have established the annual Developer Forum "Accumulator Technologies".

For the already 7th time the expert forum with exhibition will open its doors on March, 25-27 in the Stadthalle in Aschaffenburg.

Just like in 2013 we expect more than 500 visitors, 30 exhibitors as well as 30 speakers on an exhibition area of 2,000 m<sup>2</sup>. For this reason the event has successfully established as one of the most significant meeting points of the mobile electrical power supply industry.

For our international guests there will be a simultaneous translation of the german expert speeches into English. For the first time we will offer the training seminar around the topic battery packs developed properly – from conception to serial production on the first day.

On the following two days the expert forum and the exhibition will take place as usual.

- Markets and price trends
- Roadmaps
- Batteries: state-of-the-art and future technologies
- Technical innovations
- Stationary storage and net integration or rather linkage, e.g. PV systems
- Battery management systems (cell balancing and charging management)
- Charging technologies
- Test systems
- Development and research
- Adoption of new materials
- New application areas
- Production and automation
- Raw material, resources
- Equipment
- Standards and laws
- Safety

- March 25, 2014: Training seminars
- 9 a.m. – 6 p.m. Training seminar 1:  
Battery packs developed properly – from conception to serial production
- 9 a.m. – 6 p.m. Training seminar 2:  
Li-ion accumulator technologies (9 a.m – 1 p.m.)  
Battery management systems "BMS" (2 p.m. – 6 p.m.)
- March 26, 2014: Exhibition and expert forum
- March 27, 2014: Exhibition and expert forum

**Participation charge per person**

- One-day participation: 350 € plus VAT
- Two-day participation: 650 € plus VAT
- Three-day participation: 825 € plus VAT

**ATTENTION – EARLY-BIRD PRICE!**

Early-bird discount of 10 % for registration till January 17<sup>th</sup> 2014.

**REGISTRATION:**
